HOW TO INSTALL THE BATTERY

Slide battery hatch in direction of arrow in the illustration, and remove it.
Connect dry battery with battery plug, checking that (+) and (-) terminals are correctly connected.

- * Be sure to use a specified 9V dry battery (6F22) only.
- * Before changing battery, check that metronome is turned off.
- * When battery nears its end, the metronome may not work properly. Replace the battery with a new one immediately.
- * The battery included with your metronome when it was purchased is a monitor battery, and may not last as long as specified.
- * When disposing of old battery, observe the regulations of authorities concerned.
