BUFFER ABY

Specifications:

Power: DC 9V 5.5x2.1mm center negative, 80mA

Dimensions: 93.5mm (W) x 42mm (D) x 52mm (H)

Weight: 240g

Buffer ABY is a tiny, sturdy ABY Switcher with a BUFFER switch. You can choose whether to turn on BUFFER according to the scene. When the BUFFER is turned off, it is a true bypass. With the magical design you can feed your guitar signal to two amps, connect two instruments to the same amp, A/B signal route switching, and many more. Get connected with amps, pedals, instruments - You decide!

Plug in your power jack

Plug in your instruments, pedals, amps, depending on your needs

Switch from two different modes:

A/B:

toggle between A (A \leftrightarrow Y)/B (B \leftrightarrow Y) channels

AB:

both A and B channels are engaged as outputs (use Y as input only, Y \rightarrow A+B)

Plug in your instruments, pedals, amps, depending on your needs (when the Y interface is used for output, please turn off the BUFFER switch)

BUFFER switch, you can choose whether to turn on the Buffer circuit according to the scene

In A/B mode, tap the footswitch to toggle between A (LED shows red) /B (LED shows green) channels; in AB mode, the footswitch doesn't work (LED shows yellow)
